Summary

AI/ML Engineer and final-year CS undergrad (**DTU '27**) with **3 internships** (Reliance Jio, Infosys, DRDO) building **end-to-end ML pipelines** in **Python** for **NLP**, **Computer Vision**, and **Generative AI** (**LLMs, RAG, Agentic AI**) with **PyTorch, TensorFlow, and Scikit-learn**, from data preprocessing and model training to **evaluation and deployment**.

Education

Delhi Technological University 2023 – 2027
B.Tech in Computer Science Engineering, CGPA: 8.037/10 *Delhi, IN*

Experience

Reliance Jio Infocomm Limited Jun 2026 – Jul 2026
AI/ML Intern
- Engineered a modular **Named Entity Recognition (NER)** pipeline in **Python** using **LLMs** and **fine-tuned transformer models** for **token classification**, extracting domain-specific entities from unstructured text.
- Built a **Generative AI RAG pipeline** for the **JioCloud chatbot**, storing **embeddings** in **PostgreSQL with pgvector** for **semantic retrieval**, and improved response consistency through **prompt engineering**.
- Built reusable **data preprocessing** and **model evaluation** pipelines (annotation, **hyperparameter tuning**, **F1-score**).

Infosys Dec 2025 – Feb 2026
Machine Learning Intern *Remote*
- Developed a **PCB Defect Detection System** using **computer vision** and **deep learning (CNNs)** on PCB images to detect missing components, short circuits, and surface anomalies, **reducing manual inspection**.
- Built an **end-to-end ML pipeline** (preprocessing, **data augmentation**, **model training**, evaluation, **deployment**) in **Python** with **OpenCV** and **TensorFlow/PyTorch**, evaluated on **accuracy, precision, recall, and F1**.

DRDO – ISSA Lab Dec 2024 – Feb 2025
Research & Development Intern *Delhi, IN*
- Trained a **Random Forest Regressor** (**multi-output regression**) on weather data (**temperature MAE: 1.28°C**).
- Deployed via **Joblib** behind a **Spring Boot** backend for **offline inference** in a **full-stack forecasting platform**.

Projects

QFlow: Autonomous Agentic AI QA Testing Agent Live Demo | GitHub
TypeScript, Node.js, Gemini (Multimodal LLM), Playwright, Docker
- Built an **agentic AI** system combining **multimodal LLM reasoning (Gemini)**, **Playwright** automation, and heuristic scanners to autonomously explore web apps, detect **UI defects**, and validate **end-to-end workflows**.
- Implemented **23 automated testing protocols** (deep crawling, workflow execution, fuzz testing) generating bug reports with reproduction traces; **containerized with Docker** and deployed to the cloud.
- Scanned **5 live websites (78 s avg per scan)**, surfacing **37 distinct issues** at **92% precision** on manual triage.

Code-IQ.ai: AI-Powered Code Analysis Platform GitHub
Python, FastAPI, Gemini API, RAG, NetworkX, Matplotlib
- Developed an **LLM-powered static code analysis** and visualization platform for **Python and JavaScript** repositories, using **RAG-based chunking (800-char segments, 100-char overlap)** to scale to large codebases.
- Enabled **natural language queries over 100+ files** with **Gemini**, detecting **10+ categories** of code-quality issues.

Vync: Real-Time Video Streaming Platform Live Demo | GitHub
TypeScript, Next.js, Electron.js, Express.js, Socket.io, PostgreSQL, Prisma, Gemini API
- Used the **Gemini API** to auto-generate **AI titles, summaries, and transcripts** for recordings streamed via **Socket.io**.

Technical Skills

Languages: **Python**, C++, Java, SQL, TypeScript, JavaScript
AI / ML: **Machine Learning**, **Deep Learning**, Neural Networks, **Natural Language Processing (NLP)**, **Computer Vision**, CNNs, Transformers, Supervised & Unsupervised Learning, Regression, Classification, Model Evaluation, Hyperparameter Tuning
Generative AI: **Large Language Models (LLMs)**, **Retrieval-Augmented Generation (RAG)**, **Agentic AI**, AI Agents, Prompt Engineering, Fine-Tuning, Embeddings, Vector Databases, Semantic Search, LangChain, Gemini API, OpenAI API
Frameworks & Libraries: **PyTorch**, **TensorFlow**, **Scikit-learn**, NumPy, Pandas, OpenCV, Matplotlib, FastAPI, Flask
Data & MLOps: PostgreSQL, pgvector, MongoDB, MySQL, **Docker**, CI/CD (GitHub Actions), Git, Linux, Jupyter, GCP
Core CS: **Data Structures and Algorithms (500+ problems)**, OOP, DBMS, OS, System Design, REST APIs

Extracurricular

Society of Automotive Engineers (SAE-DTU) 2023 – Present
Head of Design *DTU*
- **Led** a design team of **8 members**, driving **cross-team collaboration**; raised participation **20%**.
- Organized orientation for **300+ recruits**, managed recruitment of **30+ members**, and coordinated **10+ events**.

NSSS Foundation (NGO) Sep 2024 – Present
Member
- **Mentored** underprivileged students at schools, using **clear communication** to support their learning.
