Summary

Software Engineer and final-year CS undergrad (**DTU '27**) with **3 internships** (Reliance Jio, Infosys, DRDO), focused on **full-stack** and **backend software development** in **Java (Spring Boot)**, **TypeScript/Node.js**, **React/Next.js**, and **Python** on **PostgreSQL**. Strong in **DSA (500+ problems)**, **OOP**, and **System Design**; ships tested code with **Docker** and **CI/CD**.

Education

Delhi Technological University 2023 – 2027
B.Tech in Computer Science Engineering, CGPA: 8.037/10 *Delhi, IN*

Experience

Reliance Jio Infocomm Limited Jun 2026 – Jul 2026
AI/ML Intern
- Built a **RAG pipeline** in **Python** for the **JioCloud chatbot**, storing embeddings in **PostgreSQL with pgvector** for **semantic retrieval**, and improved response consistency through prompt iteration.
- Engineered a **modular Named Entity Recognition (NER) pipeline** in **Python** using **LLMs** and transformer-based token classification to extract domain-specific entities from unstructured text.
- Built **reusable Python modules** for data preprocessing and evaluation (annotation, tuning, precision/recall/F1).

Infosys Dec 2025 – Feb 2026
Machine Learning Intern *Remote*
- Developed a **PCB Defect Detection System** using **computer vision** to identify missing components, short circuits, and surface anomalies, **reducing manual inspection**.
- Built an **end-to-end Python/OpenCV pipeline** (preprocessing, augmentation, training, evaluation, **deployment**).

DRDO – ISSA Lab Dec 2024 – Feb 2025
Research & Development Intern *Delhi, IN*
- Built a **full-stack offline weather forecasting platform** with a **Java Spring Boot** backend serving temperature, humidity, wind, and pressure predictions via **multi-output regression**, without internet connectivity.
- Trained a **Random Forest Regressor** (**temperature MAE: 1.28°C**) and integrated it via **Joblib** for **offline inference**.

Projects

Vync: Full-Stack Real-Time Video Streaming Platform Live Demo | GitHub
TypeScript, Next.js, React, Electron.js, Express.js, Socket.io, PostgreSQL, Prisma, Jest, GitHub Actions
- Built a **full-stack** platform end to end: multi-window **Electron** recorder (screen, mic, webcam at **720p/1080p**), **Next.js/React** frontend, **Express.js** backend, and **PostgreSQL**.
- Designed a **low-latency, real-time chunked upload pipeline** streaming **1-second WebM chunks** over **Socket.io (WebSockets)**, so a **72 s, 23 MB recording is ready in under 2 ms after stop** (vs. ∼18 s for a full upload).
- **Load-tested scalability** across **10 parallel uploads** with **byte-exact reassembly** and **5 ms p95 chunk-write latency**; wrote **17 Jest tests**, set up **GitHub Actions CI/CD**, and **fixed a path-traversal security vulnerability**.
- Architected a **10-model relational PostgreSQL schema** (**Prisma ORM**, 19 relations); generated AI titles, summaries, and transcripts with the **Gemini API** via **bounded polling**.

QFlow: Autonomous QA Testing Agent Live Demo | GitHub
TypeScript, Node.js, Playwright, Docker, Gemini, Render
- Built an **automated QA testing platform** in **TypeScript** and **Node.js** combining **Playwright** browser automation, heuristic scanners, and **Gemini** reasoning to explore web apps, detect **UI defects**, and validate **end-to-end workflows**.
- Implemented **23 modular automated testing protocols** (deep crawling, workflow execution, **fuzz testing**) generating bug reports with screenshots and reproduction traces; **containerized with Docker** and deployed to the **cloud** (Render).
- Scanned **5 live websites (78 s avg per scan)**, surfacing **37 distinct issues** with **92% confirmed valid** on manual triage.

Technical Skills

Languages: **Java**, **C++**, **Python**, **TypeScript**, JavaScript, SQL, HTML/CSS
Frameworks & Libraries: **React.js**, **Next.js**, **Node.js**, **Express.js**, **Spring Boot**, FastAPI, Socket.io, Electron.js
Databases: **PostgreSQL**, MongoDB, MySQL, Prisma ORM, pgvector, Schema Design, Query Optimization
DevOps & Testing: **Docker**, **CI/CD (GitHub Actions)**, **Git**, Linux, Postman, Jest, Playwright, Unit Testing, Vercel, Render
Core CS: **Data Structures and Algorithms (500+ problems)**, **Object-Oriented Programming (OOP)**, **System Design**, **REST APIs**, DBMS, Operating Systems, Computer Networks, Concurrency, Asynchronous Programming, Performance Optimization, Problem Solving, Debugging, Code Reviews, Agile, SDLC
AI / ML: Generative AI, LLMs, RAG, Prompt Engineering, Gemini API, PyTorch, Scikit-learn, OpenCV, NumPy, Pandas

Extracurricular

Society of Automotive Engineers (SAE-DTU) 2023 – Present
Head of Design *DTU*
- **Led** a design team of **8 members**, driving **cross-team collaboration**; raised participation **20%**.
- Organized orientation for **300+ recruits**, managed recruitment of **30+ members**, and coordinated **10+ events**.

NSSS Foundation (NGO) Sep 2024 – Present
Member
- **Mentored** underprivileged students at schools, using **clear communication** to support their learning.
